

TT VISTA PRO ANTENNA

The TT Vista terrestrial antenna is an antenna created for DVB-T2 reception in the UHF band. The TT Vista PRO model is a directional antenna offering high gain reception in the UHF band (>17dB). It is a professional antenna for receiving signals from long distances. Thanks to the lengthened design, it is also possible to eliminate many unwanted signals.

5G Protected technology guarantees that the antenna will only receive signals from the band designated for DVB-T/T2 TV broadcasting. GSM, LTE, 5G signals will be effectively eliminated, ensuring that the home installation is adequately protected.

Assembly of the antenna takes less than 2 minutes and requires no tools. Most components are connected without screws. Tilt adjustment is also possible.

This solution is ideal for use in both multi-family and single-family buildings.

TT VISTA PRO

Key features:

- antenna designed for the UHF band,
- high gain: min. 17dB,
- frequency range 470-694MHz,
- 5G Protected technology,
- quick installation, no tools required
- ready for DVB-T/T2 reception,
- weather-proof design,
- dipole and symmetrizer protected,
- Long reception range > 80 km.

TECHNICAL DATA

PARAMETERS	UNITS	TT VISTA PRO
UHF frequency range	MHz	470-694
Channels	/	21-48
UHF gain	dB	17
Radiation angle	°	H38 / V52
F/B ratio	dB	15-25
Impedance	Ohm	75
Connector type	/	F żeńskie
Antenna length	mm	1085
Box dimensions	mm	790x230x140
Gross weight	kg	2
Index no.	/	WAN-0104-013-01
EAN code	/	5903953011527
