

Cabinets, telecommunication boxes

AIZ-210

RoHS

The **AIZ-210*** type box is designed for mounting radio/TV/SAT equipment in multi-family buildings in accordance with applicable building regulations.

One SWK-9216 MultiBAS and up to eight multiswitch expansion devices can be installed in the box: SMK-216x cascade multiswitches and STWK-810 amplifiers (the final number of amplifiers will depend on the energy balance of the system). This solution allows for provision of summarised of radio/TV/SAT signals to 128 subscribers. Additionally, by placing the SSK-918 bus coupler on the SWK-9216 MultiBAS casing, it is possible to extend the multiswitch system by adding more receiving points.

The **AIZ-210** type box is designed for mounting on a wall or in RACK-19" cabinets.

- **Mounting on the wall, in the RACK-19 "cabinet**
- Predrilled holes for the assembly of T-urbo-T line devices
- Standard 230V power socket and a 12V/5A power supply
- Cabinet dimensions: 482x899x407mm

TECHNICAL PARAMETERS

NAME/PARAMETERS		AIZ-210 assembly box
External dimensions	mm	482x899x407
Purpose	/	dedicated for T-urbo-T multiswitches
Capacity (number of multiswitches)	/	10
230V socket/23V power supply	/	yes
Material of the cabinet	/	galvanised steel plate
Installation place	/	RACK19" cabinet or wall
Product dimensions	mm	482x899x407
Net weight	kg	17
Package	/	bubble wrap

* The AIZ-210 box is delivered without the devices shown in the picture.

Technical parameters may change without a previous notice.
