

Omnidirectional FM radio antenna

FM-1+

FM-1+ is an omnidirectional, outdoor radio antenna designed to operate in the analog band: 87.5-108MHz. The antenna has a built-in balun 75 Ohm, which is terminated with an "F" socket.

Thanks to the robust antenna design and high-quality components, the antenna is very durable and resistant to changing weather conditions.

- Omnidirectional FM radio antenna
- **Gain 2.0dBi**
- Solid design
- Weather resistant
- Easy assembly and installation

TECHNICAL PARAMETERS

TYPE		FM -1+
Operating frequency range	MHz	87,5-108
Gain	dBi	2
Output impedance	Ohm	75
Radiation front/back	dB	0
Polarization	/	H
Signal connector type	/	F socket
Antenna type	/	passive antenna
Max. diameter of the mounting mast	mm	50
Colour	/	grey
Antenna dimensions	mm	500x530x100
Net weight	kg	0,65
Package	/	plastic bag
Index	/	WAN-0106-001-02

Technical parameters are subject to change without prior notice
